High-Tech Workshops for Teachers

Summer 1999

The Earth and Space Science Technological Education Project (ESSTEP) announces its third season of teacher professional development workshops. The project is a joint effort of the Geological Society of America, Cypress College and the Space Science Institute. The workshops train secondary and college faculty in the classroom use of computer and information-based technologies used in earth, space and environmental science.

Hands-on training in Global Positioning Systems, Geographic Information Systems, Image Processing and Multimedia are interwoven with field experiences, assessment of student learning and effective teaching practices. Workshop members must participate in two consecutive summer workshops and register as 2-4 person teams. Continuing education credits are available.

The summer 1999 workshops' schedules are July 6-17 in Boulder, Colorado, and July 26-August 7 in Williamsburg, Virginia. For information and an application, contact:

Holly Devaul
Geological Society of America
3300 Penrose Place
Boulder, CO 80301
303-447-2020, ext. 150
e-mail: hdevaul@geosociety.org

Applications are due by March 1, 1999.
